

# ROS-I Training Class

## BASIC DEVELOPERS' TRAINING CLASS

June 6 – 8, 2017

Presented by Southwest Research Institute

# INTRODUCTIONS: SWRI

# SwRI: Deep Sea to Deep Space

**Independent.  
Advanced Science.  
Applied Technology.  
From *Deep Sea*  
To *Deep Space*.  
And Everything in between.**

## ■ Alvin

- Tested at SwRI before first (1964) record-setting dives > 8,000 ft.
- Redesigned (2013) new Alvin (3" titanium sphere) capable of > 21,000 ft.

## ■ New Horizons

- SwRI-lead
- Launched: Jan. 19, 2006
- Closest approach to Pluto: July 14, 2015
- Fastest spacecraft ever: ~30,000 mph

# SwRI: Deep Sea to Deep Space

## And Everything Between!

Spacecraft &  
Planetary  
Sciences

Energy

Robotics,  
Automation, and  
Simulations

Regenerative  
Medicine

Lubricants  
Testing

Pharmaceuticals &  
Bioengineering

Materials &  
Engineering

Infrastructure  
Communications

Engine Design and  
Optimization

Water and  
Geological  
Engineering

# INTRODUCTIONS: INSTRUCTORS

# Instructors

**Jeremy Zoss**

**Austin Deric**

# INTRODUCTIONS: OTHER SWRI PERSONNEL

# Contact Info

**Matt Robinson**

Program Manager

Daily Schedule, Wiki & Github (Slides, Exercises)

# CLASS LOGISTICS: AGENDA AND NAVIGATION

# Monday Agenda

- 0815 Shuttle Departs the Marriott Westover Hills
- 0835 Sign-in, Introductions, and Agenda
- 0900 ROS Setup, Catkin, Installing Packages
- 1015 Break
- 1030 Creating Packages/Nodes, Topics, Messages
- 1200 Lunch – SwRI Overview Presentation
- 1300 Services, Actions
- 1430 Break
- 1445 Launch Files, Parameters
- 1720 Shuttle Departs for Dinner
- 1800 Group Dinner at Viola's

# Tuesday Agenda

- 0815 Shuttle Departs the Marriott Westover Hills
- 0835 Recap and Agenda
- 0900 URDF, Workcell XACRO
- 1015 Break
- 1030 TF, Build a MoveIt! Package
- 1200 Lunch – SwRI Lab Tours
- 1330 Motion Planning Using Rviz, C++
- 1500 Break
- 1515 Descartes Path Planning, Intro to Perception
- 1720 Shuttle Departs for Dinner
- 1800 Group Dinner at Lone Star Cafe

# Wednesday Lab Agenda

- 0815 Shuttle Departs the Marriott Westover Hills
- 0835 Recap and Agenda
- 0900 Building a Perception Pipeline, Recap
- 1030 Break
- 1045 Lab Introduction, Lab Time
  1. Pick and Place Application
  2. Descartes Application
- 1200 Lunch
- 1245 Work on Lab Applications
- 1530 Wrap-up, Surveys
- 1600 Shuttles Depart for Airport and Hotel
- End

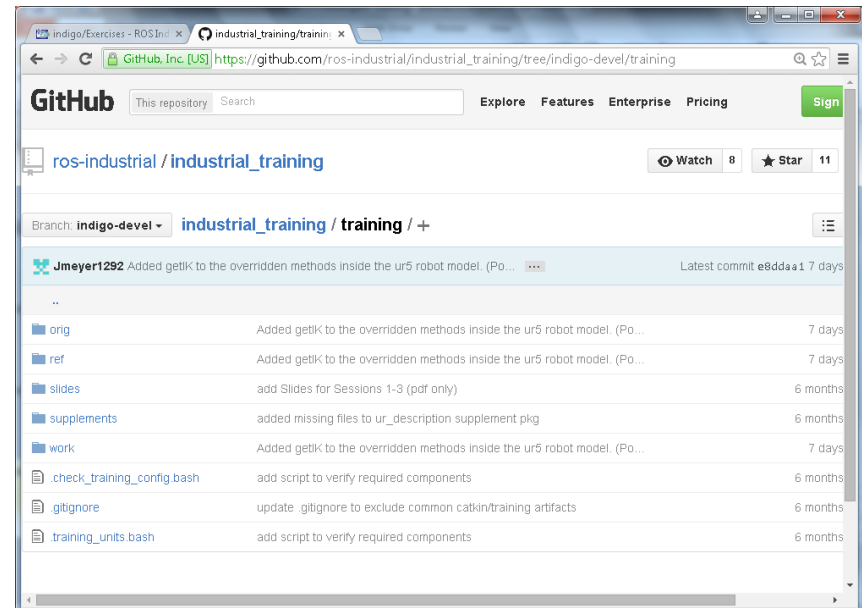

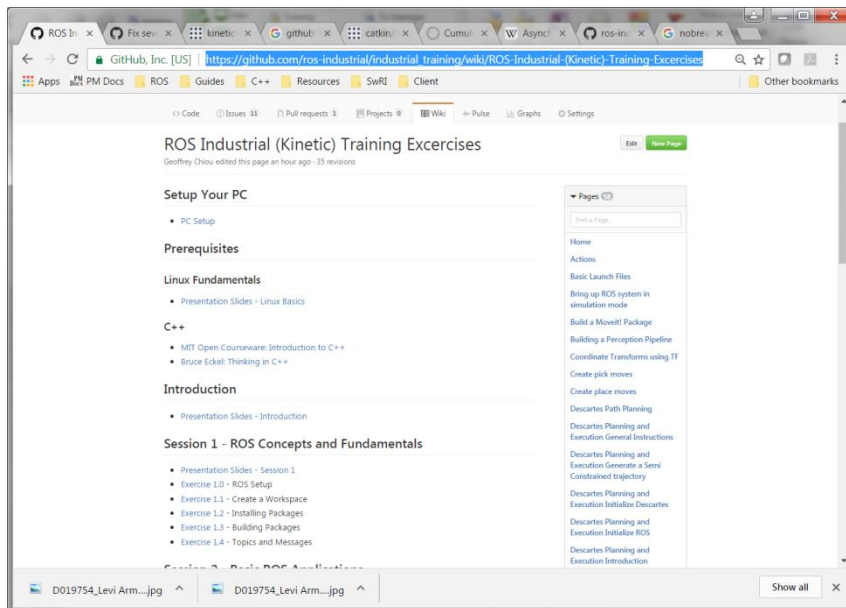

# Wiki & Github

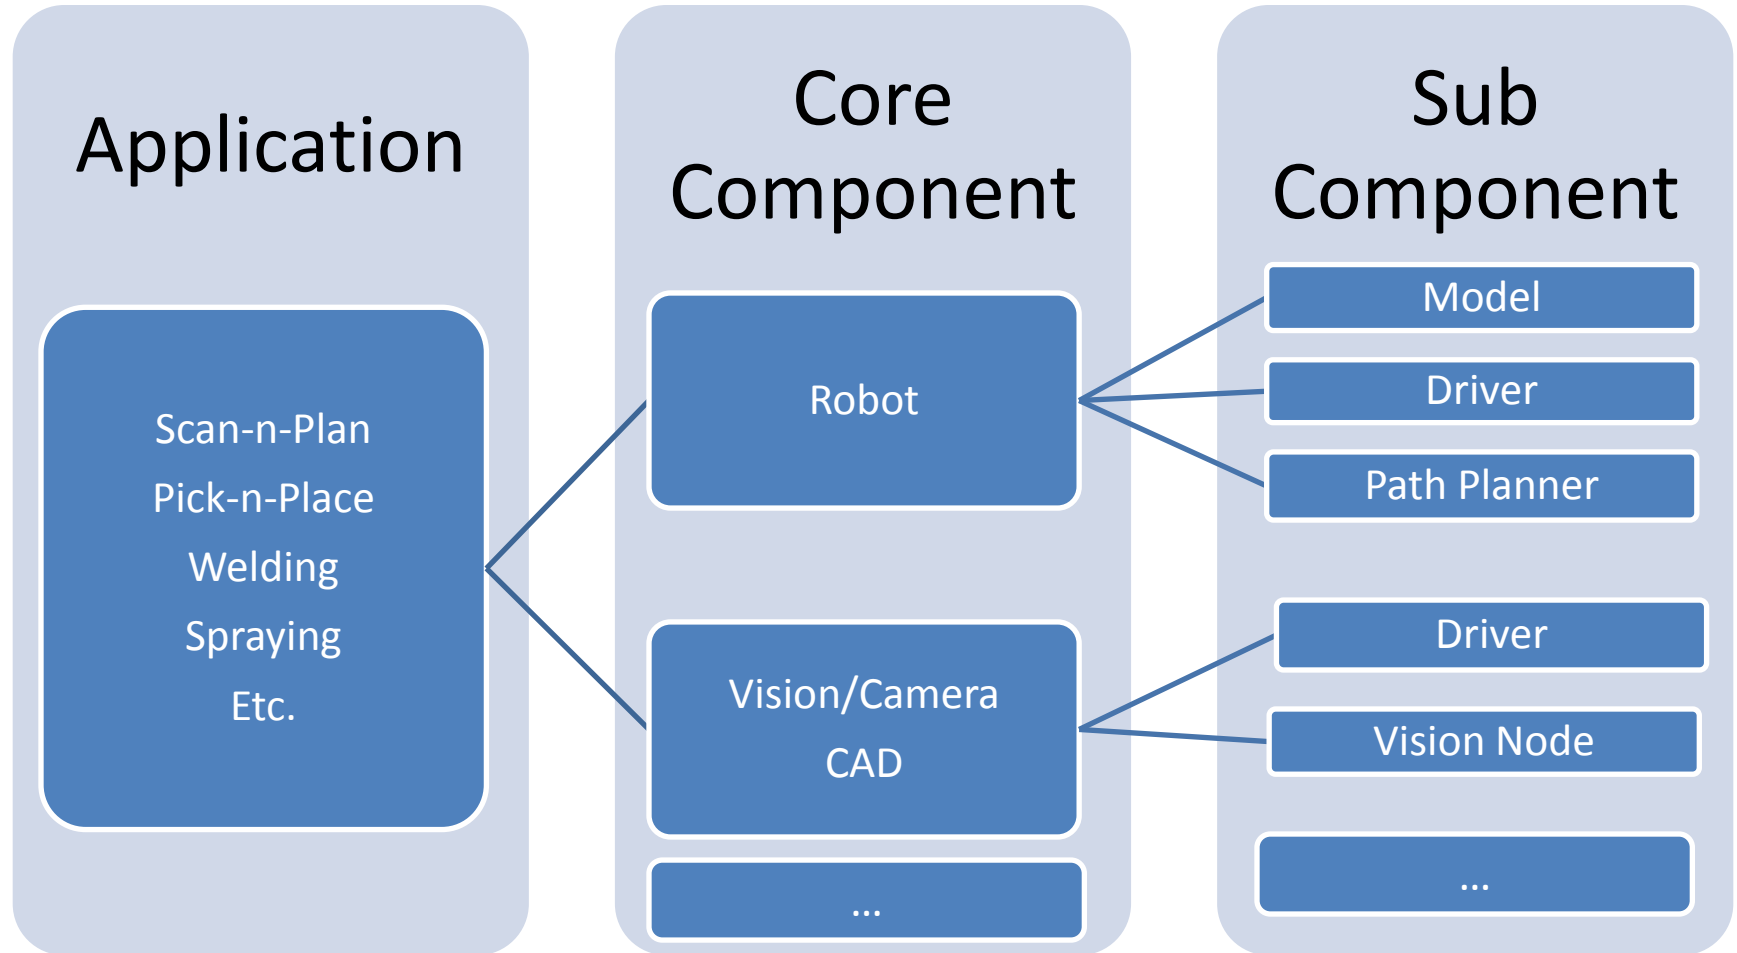

[https://github.com/ros-industrial/industrial\\_training/wiki](https://github.com/ros-industrial/industrial_training/wiki)

[https://github.com/ros-industrial/industrial\\_training](https://github.com/ros-industrial/industrial_training)

# Generic App. Architecture

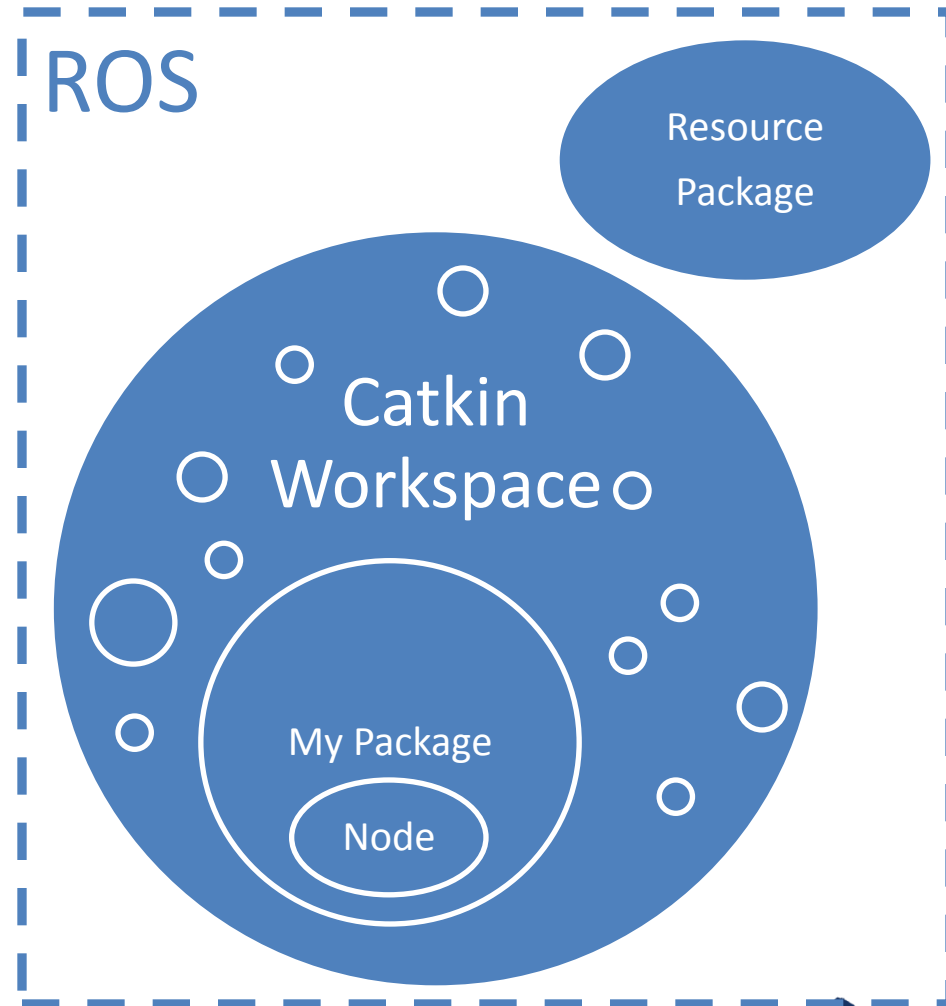

# Day 1 Progression

- ☐ Install ROS
- ☐ Create Workspace
- ☐ Add “resources”
- ☐ Create Package
- ☐ Create Node
  - ☐ Basic ROS Node
  - ☐ Interact with other nodes
    - ☐ Messages
    - ☐ Services
- ☐ Run Node
  - ☐ rosrn
  - ☐ roslaunch

# Day 2 Progression

- ☐ Build on Day 1 nodes
- ☐ Use TF
- ☐ Create Robot Model
  - ☐ Basic, URDF
  - ☐ Advanced, xacro
- ☐ Integrate Robot Model
  - ☐ MoveIt
- ☐ Integrate Path Planner
  - ☐ Descartes
- ☐ Dabble in Perception

# Day 3 Overview

☐ Review Day 1/2 Topics

☐ Self-Paced Application Demos

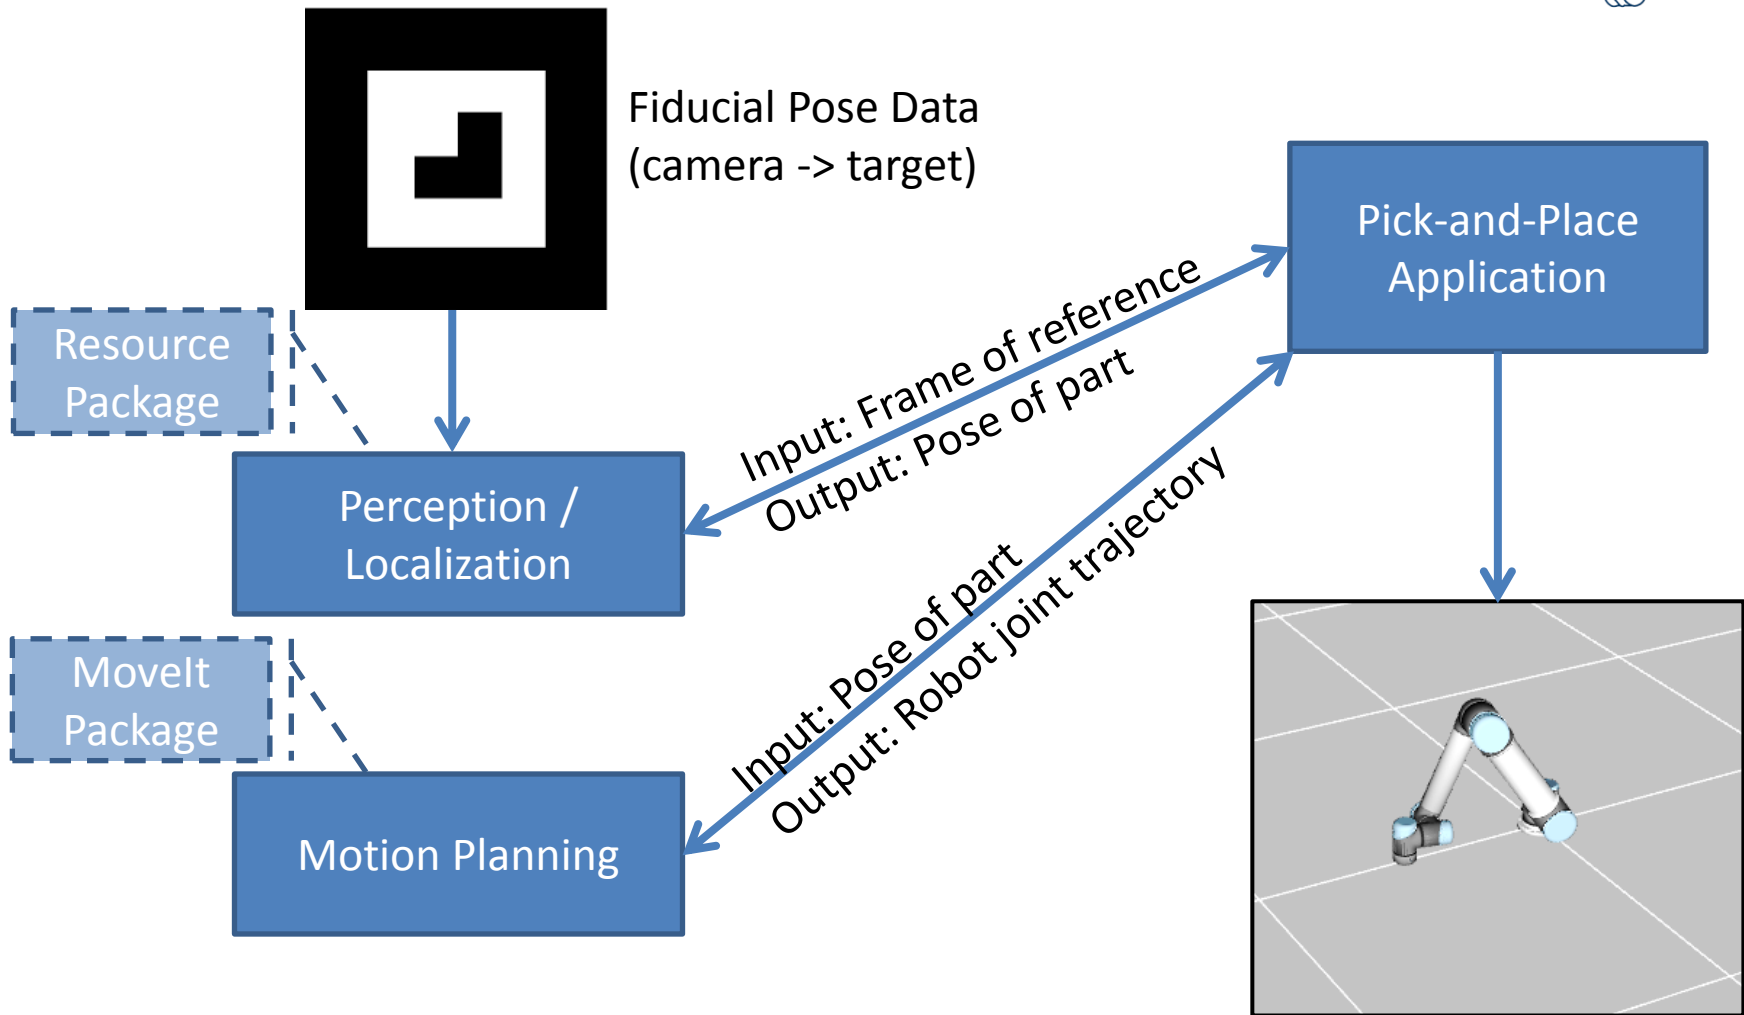

1. Perception-Driven Manipulation

*(a.k.a. Vision-Guided Pick & Place)*

2. Descartes Planning & Execution

*(a.k.a. Semi-Constrained Path-Planning)*

# Demo #2: Descartes

Semi-Constrained  
Path Points

Input: Path Constraints  
Output: Robot Joint Trajectory
